SUMMARY: AWS CERTIFIED DEVELOPER ASSOCIATE | AWS CERTIFIED SOLUTION ARCHITECT ASSOCIATE

High-impact Cloud DevOps Engineer working on a variety of technologies central to modern app deployment and development for large scale infrastructure and deployments, with comprehensive knowledge from how code goes from the hardware to end-user including: client-server architecture, database architectures, cloud, APIs, employing web-app and network security, and cloud-native technologies.

TECHNICAL AND SOFT SKILLS

Programming/Scripting (C, C#, SQL, Python), CI/CD (GitHub Actions), Git, F5 BIG-IP Products (LTM, DNS, Hardware), Operating Systems, Microservices, Networking, Virtualization (VMware ESXi), Load Balancing, Linux Administration, bash, APIs, Network Security, Containerization (Docker, Kubernetes), Incident Response, Technical Operations Support, Web App Security (OWASP), IaC (AWS CDK, CloudFormation, Terraform), HTML, CSS, 4G EPC, 5GC, Performance Tuning/Monitoring, AWS Architecture, AI Infrastructure

PROFESSIONAL EXPERIENCE

Amazon Web Services (AWS) **June 2024 – May 2026**

- **Cloud Support Engineer – Networking, Monitoring, and Scaling:** Performed troubleshooting of AWS networking, server performance and configuration, monitoring cloud infrastructure using pivotal metrics and interpreting metrics, automated deployments and event-based architecture, as well as effective scaling strategies for Business and Global Enterprises
    - Conducted live troubleshooting sessions, incident response of high-profile cloud outages, and provided novel solutions and architecture guidance to top tier, global customers
        - Specialized in AWS VPC, ELB, CloudWatch, Autoscaling, and VPC Lattice
        - Analyzed multiple layers of live and historical metrics, logs, HAR captures, and internal monitoring dashboards
        - Consulted customers on complex multi-account integrations including Container and Deployment Services (ECS, EKS), automation, and SSL/TLS
    - Onboarded onto ELB escalation team that handles highly complex outages or performance degradation and potential grey failures at a 100-200% faster rate than typical employee timeline
        - Reviewed currently deployed software code for AWS ELB to troubleshoot potential bugs, assist Software Development Engineers, or code-level behavior of product
    - Selected to be on team that is prioritized for contact with strategic AWS partners for troubleshooting and system recovery
    - Created technical training for peers and mentored junior engineers on effective troubleshooting, soft skills, and quality customer interactions
    - Created MVP using .NET and pitched idea of automated cross-account support permissions for VPC Lattice service and other multi-account services to senior leadership
    - Decreased MTTR for CloudWatch with internal publications that deep-dive into Linux-based agent

F5 Inc. (Formerly F5 Networks Inc.) **March 2020 – May 2023**

- **Associate Solutions Engineer – Service Provider:** Created and assisted versatile app deployment solutions for customer use cases and met business goals using F5 product line and cloud-native technologies, including containerized deployments like Docker and Kubernetes, microservice architecture, virtualization of servers, Linux, NGINX, and private data center technologies.
    - POCs implementing automation, CI/CD, K8s, Docker, AWS EC2 instances, guiding digital transformation.

ODERA O. ENEUGWU

WYLIE, TX ▪ 832.881.3964 ▪ BENEUGWU.ENGR@GMAIL.COM▪ HTTPS://WWW.LINKEDIN.COM/IN/OENEUGWU/
▪HTTPS://ODERALABS.LINK

- Wrote bash scripts for automating Linux (Ubuntu, CentOS) systems, integration of hardware, software, and communications in demo environments, troubleshooting in production environments.
- Developed and deployed a sample application written in .NET Core/Typescript/Entity Framework Core using SQLite, HTML, CSS, and hosted on NGINX on VMs in my home lab, running ESXi as a Hypervisor to simulate hybrid cloud app deployment with AWS EC2 instances for performance testing and analysis.
- Prepared and delivered technical presentations to customers and internal team members to communicate and teach about F5 solutions and related cutting-edge technology.
- Collaborated with Tier1 – Tier 3 service providers to achieve organizational goals in application and data center infrastructure including AWS deployment, WAF, High Availability, and backup strategies.
- Troubleshooting of support cases ranging from General Question to Site Down, and recommending industry best practices
- Established a monthly technical deep-dive webinar that drastically expanded the skillset of team on internal and industry relevant and wide-ranging topics from 5G, security, to cloud-native tools.

Space City Marketing – Comcast Business Class **Dec 2016 – Aug 2017**

- **Corporate Trainer**: B2B technical sales, customer interaction, interviewing, mentoring new hires.

Power DB **Jan 2015 – July 2016**

- **Software Engineering Intern**: Programmed .NET desktop applications using Microsoft stack in C++/C#/SQL.
  - Independently designed customer specific application for data processing for authenticated users

EDUCATION

- Boston University
  - Master of Science in Computer Science and Artificial Intelligence **Aug 2026-Present**
  - Part-time
- Texas A&M University, College Station, TX **Aug 2011 - May 2016**
  - Bachelor of Science in Electronic Systems Engineering Technology **May 2016**

CERTIFICATIONS

- AWS Developer Associate
- AWS Solution Architect Associate
- AWS Certified AI Practitioner
- F5 Technical Sales Professional
- F5 Technical Sales Modern Apps Specialist
